

Getting the Error Message displayed below?

“Do you want to save this file, or Find a Program online to open it?”

Answer: Your computer does not have software properly installed that will display some of the components in this web site. Please link to the following site to download a free Adobe Reader program. (If Adobe Reader is installed, you will need to un-install before downloading.) The Adobe Reader program displays *.pdf files* properly with an initial install.

<http://get.adobe.com/reader/>

Once the program is on your computer, this site should display correctly.
